TECHNICAL PROJECTS

Task Manager - <https://github.com/gkiarie1/Phase2-Group5-Project>

This is a web application designed to allow users to create, update, delete and mark tasks as completed.

- Utilized React Js as the framework for building the user interface.
- Implemented Javascript language to handle the client-sided logic.
- Implemented a local JSON server as a lightweight mock rest API for managing our tasks.
- Utilized teamwork skills to successfully collaborate and complete the project in time.

The Playlist - <https://github.com/ALEXNJOROG/phase-3-project-music-manager>

This is a program crafted to allow connoisseurs of music to organize a list of their favorite songs on the basis of the artists and their particular tracks.

- Implemented python's one to many ORM to enable an artist to have multiple songs.
- Utilized the terminal to prompt the user for input and to enable navigation through the application's menu.
- Utilized the class models to generate a music database for holding the artists and songs the user inputs.
- Implemented Sqlite CRUD operations logic to interact with the music database created.
